Monroe, GA 30656

MODEL DTR2310 with Speaker Series  
FORM #25-2200-04

**TOOLS REQUIRED:** Standard Flat Blade & Phillips Screwdrivers  
Wire Cutters / Stripper  
Crimp Tool  
Common Sense

**PROLOGUE:**

Your objective is to provide local speaker output and volume control of the wall / shelf mounted television and not use the internal speaker since their controls may be out of nominal reach of the potential user.

The DTR-2310ST series of combination speaker and volume controls can in some variations include a model with a built-in headphone jack for use in areas such as dialysis, open wards, etc. Further, some versions include a three wire jack for use with a remote pillow speaker control with its own speaker, volume control and a two conductor jack for use with push button cordsets for remote channel control.

In all the drawings and references below, color codes are as follows:

RD = RED	Audio High (+)
BK=BLACK	TV Channel and Audio Common (Grd)

*Thank you for choosing DICOM audio products!*
