

DTR-2130ST Shown

DTR-2130 Series

TV CHANNEL CONTROL STATION

Models

DTR-2130ST
DTR-2130WT

Description

The DTR-2130 series of TV channel change control stations are electrically identical to the DTR-2020 series except with no volume control.. This station has controls on the same gang, thus permitting the minimum backbox size available.

Each model is built upon the popular decorator style chassis allowing for many mounting options. The channel change knob is an unmistakable red button.

The channel change switch is a low travel SPST momentary type. Each device has uniquely color coded wiring for ease in installation.

Each DTR-2130#T comes complete with installation instructions, crimp connectors, mounting screws, and either a stainless steel or white plastic trim plate as ordered.
